

DOUBLE PALM LONG WELDING GLOVES

Welding requires protection, and the Double Palm Long Welding Gloves provide just that. Designed for durability and safety, these gloves offer extra palm reinforcement for added grip and heat resistance. The extended length protects the wrists and forearms from sparks, heat, and metal splashes. Whether you're a professional welder or working on DIY projects, these gloves ensure comfort and security during every task.

When working with high temperatures and molten metal, hand protection is a top priority. The Double Palm Long Welding Gloves are built to withstand harsh conditions, ensuring that your hands remain safe without compromising flexibility. The double-layered palm not only improves grip but also absorbs shocks, reducing hand strain during long hours of work. Whether you're handling hot metal, using welding torches, or grinding surfaces, these gloves provide reliable performance. Their ergonomic design allows for a comfortable fit, ensuring ease of movement while maintaining the highest level of protection.

Product Specification:

Brand Name:	Leather welding gloves
Model:	Kasweld
Material:	cowhide split leather
Leather Grade:	AB Grade
cuffs:	leather gauntlet cuff
Material Type:	reinforced double palm and thumb
Standards Compliance:	EN388 and EN420 HALAL
Protection:	Abrasion protection
Model:	KASWG16

Features :

- 1. Double Palm Protection** – Extra padding on the palm enhances grip and durability while reducing hand fatigue.
- 2. Heat & Flame Resistance** – Made from high-quality leather to withstand high temperatures and metal sparks.
- 3. Extended Cuff Design** – Longer sleeves provide extra coverage for wrists and forearms, reducing the risk of burns.
- 4. Reinforced Stitching** – Heavy-duty Kevlar stitching ensures strength and prevents wear and tear.
- 5. Comfortable Fit** – Soft inner lining for comfort while maintaining flexibility for easy hand movement.
- 6. Multi-Purpose Use** – Ideal for welding, metalworking, grinding, and other industrial tasks.

Applications:

1. Designed for welding and heat-related tasks, not for electrical work or extreme fire exposure.
2. Inspect for wear and tear before use; damaged gloves may reduce protection.
3. Heat-resistant but may cause discomfort with prolonged extreme temperature exposure.
4. Use with proper safety gear for complete protection.

Disclaimer

The Double Palm Long Welding Gloves are designed for welding and heat-related applications but are not fireproof. They should not be used for direct and prolonged exposure to open flames. These gloves are not suitable for electrical work, chemical handling, or tasks involving sharp objects that may puncture the material. Regular inspection for wear, tear, or damage is essential, as compromised gloves may reduce protection and should be replaced immediately.
