

# Welding Holder Japan Model

Elevate your welding expertise with the Kasweld Welding Holder 500 Amp Japan Model, a pinnacle of industrial welding technology. This welding holder is engineered for heavy-duty applications and is a testament to precision engineering and superior craftsmanship. Kasweld, known for its unwavering commitment to quality, presents a welding holder that redefines performance and reliability for the most demanding welding tasks.

The Kasweld Welding Holder 500 Amp Japan Model is purpose-built to deliver exceptional welding performance, boasting an impressive 500 Amp capacity. Its rugged construction and utilization of high-grade materials ensure longevity and durability, making it an indispensable tool for prolonged use in the most challenging welding environments. Crafted to perfection, the Kasweld Welding Holder 500 Amp Japan Model symbolizes innovation and excellence in welding technology. Its ergonomic design, including a heat-resistant handle and a firm grip, ensures maximum comfort and control during welding operations, empowering welders to achieve precise results consistently. With the Kasweld Welding Holder 500 Amp Japan Model, you can trust its capability to handle a variety of electrodes, making it a versatile choice for professionals across different welding applications.

## Technical Specification:

Item Name:	Welding Holder
Max AMP:	500 Amp
Model:	Japan Model KASWHJ500
Brand:	Kasweld
Material:	High-grade Steel
Insulation:	Heat-resistant Insulation
Usage:	Welding
Dimensions :	25 cm x 5 cm x 12 cm
Duty Cycle:	60% at 500A
Clamp Material:	Copper Alloy
Compatible Electrodes:	Up to 5.0mm

### **Insulation:**

The Kasweld Welding Holder 500 Amp Japan Model has advanced heat-resistant insulation, ensuring safe and efficient welding operations even in high-temperature conditions. This insulation protects the user from the heat generated during welding, reducing the risk of burns and providing a comfortable and secure grip. The heat-resistant insulation not only enhances safety but also improves the overall usability and longevity of the welding holder.

### **Safety Precautions:**

1. **Wear Appropriate Safety Gear:** Prioritize your safety by wearing the necessary welding safety gear, including a welding helmet, gloves, protective apron, and appropriate eyewear.
2. **Regularly Check Insulation:** Before each use, meticulously inspect the welding holder's insulation for signs of wear, tear, or any damage. Refrain from using it if the insulation appears compromised.
3. **Optimize Work Environment:** Maintain a secure and well-ventilated work area devoid of flammable materials to mitigate potential fire hazards during welding activities.
4. **Electrical Safety:** Inspect the power cables for frays, cuts, or exposed wires. Do not use the welding holder if the lines are damaged.
5. **Handle with Care:** Treat the welding holder gently and avoid any form of dropping or undue impact that could harm its internal components.

### **Disclaimer:**

Kasweld, the Welding Holder 500 Amp Japan Model manufacturer, declares that this product is intended solely for professional use by qualified and trained individuals. Kasweld shall not be held responsible for any misuse, mishandling, or improper operation of this welding holder, which may result in injuries, accidents, or property damage. Users are strongly advised to carefully read and follow all provided instructions, safety precautions, and guidelines in the user manual before operating the welding holder. Furthermore, users should seek appropriate training and adhere to industry-standard safety practices.
